

Why Oi-Noise?

## Why Oi Noise?

### Simple

No training, no maths, no complicated measurements. If you can hear the continuous sound clearly over the noise in the background, the noise in the workplace is below 80dB and so no action is required.

### Easy

Pull the pin, hold roughly 40 cm from the ear and...listen. What could be easier?

### Affordable

At only £17.50 per unit, prices can go down to £10.50 if you order more. Can you really afford not to act?

### Small & Light

Measuring only 5cm long x 3.5 cm wide x 1cm deep and weighing only 20 grammes, it can be carried anywhere and everywhere.

### Designed By A Safety Professional

The Oi tool has been designed by a safety professional to make life easier. Using the Oi ANYONE can now easily identify noise hazards in the workplace.

### Unique

With worldwide patents pending, the Oi tool is unique in its simplicity in addressing an often complex problem.

With nearly 30,000 members worldwide, including more than 8,000 Chartered Safety and Health Practitioners, The Institute of Occupational Safety and Health (IOSH) is Europe's leading body for health and safety professionals. Oi Noise limited is therefore delighted to announce that the inventor of the Oi tool, Jane E. Jemmett MIOSH, has been adjudicated the winner of the IOSH 2006 Practical Project Award. The judging panel comprised of members of the IOSH Professional Affairs Committee who thought that the Oi was both imaginative and eminently usable. Jane will be attending a VIP reception before collecting her award at the IOSH Annual Dinner and Awards Ceremony on Wednesday 15th November 2006 at the Midland Hotel in Manchester.

**Awards** - Regional finalist for the British Chamber of Commerce Microsoft Innovation Award 2006.

**Accreditation** - Supported by London South Bank University

### Who's Using Oi Noise?

**Balfour Beatty**
